Milad Nooraei

Melbourne, VIC, Australia | (+61) 422 144 417 | miladnooraiy0@gmail.com | Portfolio | LinkedIn | GitHub

Education

Master of Data Science — **Mar 2025 – Dec 2026**
Monash University — *Melbourne, Australia*
- **GPA:** 81.08/100
- **Relevant Coursework:** Foundations of Data Science, Introduction to Python Programming, Introduction to Databases, Project Management

Bachelor of Computer Engineering — **Sep 2020 – Sep 2024**
Shiraz University — *Shiraz, Iran*
- Built a strong foundation in programming, algorithms, data structures, and software development

Experience

Data Analyst Intern — **Jul 2023 – Feb 2024**
Shiraz University of Medical Sciences — *Shiraz, Iran*
- Cleaned and organized ICU patient data to improve data quality and create a reliable database for future analysis
- Applied APACHE II & III scoring models to assess patient conditions and support healthcare analysis
- Worked with medical data to identify patterns and provide useful insights for research and decision-making

Teaching Assistant — **Sep 2023 – Jan 2024**
Shiraz University — *Shiraz, Iran*
- Helped students understand Python programming and object-oriented programming concepts
- Supported students with coding exercises, problem-solving, and practical assignments

Data Analyst Intern — **Apr 2023 – Jun 2023**
Quera — *Tehran, Iran*
- Worked in teams on data analysis projects using Python, SQL, and statistical methods
- Built dashboards using Power BI, Plotly, and Streamlit to present data and highlight key findings
- Presented project results, explained insights, and shared recommendations with team members

Projects

Renery – Smart Energy Planner — **Live Website (Password: test)**
- Developing a web application that helps Australian households choose greener and more cost-effective times to use electricity
- Collected, cleaned, and managed Australian energy data from AEMO and electricity plan data from AER
- Worked with the team to combine renewable-energy forecasts, smart scheduling, and environmental impact tracking

Spotify Analytics — **GitHub Link**
- Collected, cleaned, and analyzed music data using Python and SQL to identify listening patterns
- Built interactive dashboards using Streamlit and Power BI to present findings clearly
- Applied clustering, regression, and classification models to explore song popularity and audio features

Chronic Disease Prediction — **GitHub Link**
- Analyzed healthcare datasets in R to understand factors linked to chronic disease risk
- Cleaned and prepared data, explored patterns, and selected useful features for prediction
- Built and evaluated classification models to support data-driven healthcare insights

Leadership & Activities

Data & AI Officer — **Sep 2025 – Jan 2026**
Monash Data & AI Society — *Monash University, Australia*
- Supported student engagement and helped organize activities related to data science and AI

Volunteer Team Member — **Mar 2021 – Jul 2022**
Hour of Code — *Shiraz University*
- Taught introductory Python concepts and helped students build confidence in programming
- Supported event activities, media, and coordination with other volunteers

Vice Representative — **Dec 2021 – Mar 2022**
SampCode — *Shiraz University*
- Helped organize a two-week programming program for more than 100 students
- Coordinated teaching and support teams to keep activities organized and on schedule

Skills

- **Programming:** Python, R, SQL, Java, C
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI
- **Machine Learning:** Scikit-learn
- **Databases:** MySQL, PostgreSQL, Oracle
- **Tools:** Jupyter Notebook, VS Code, Streamlit, Git
